Acknowledgments

The data contained in the Annual Report of Labor Market Information was prepared by the Workforce Information Division of the Utah Department of Workforce Services in connection with its normal operations. Specifically, the labor force, employment, and wage data were compiled in fulfilling contracts with the U.S. Bureau of Labor Statistics.

Many individuals within WI contributed to this publication. Special recognition is given to the following staff:

Kris Beckstead
Dana Knold
Mark Knold
Paul Peterson
Eileen Schroeder

Utah's Economy - 2008

It was a powerful economic tsunami that rolled over the state of Utah in 2008. The consequences of the national subprime mortgage meltdown that began in late 2007 overwhelmed Utah. There were times in the past when national economic woes did not translate into a Utah slowdown. But this national downturn was too powerful. It came in two waves. The first wave actually began in late 2007, when new home building permitting was basically reduced by half, and this resulted in the residential construction workforce being cut back in an aggressive fashion.

The second wave emerged in late 2008, after the deep-seated unraveling of the subprime mortgage labyrinth finally made it clear who within the financial market was impacted and by how much. The result was that the mortgage woes now permeated throughout the greater economy, causing a deep-seated employment contraction throughout the nation's and Utah's economies. The year ended on a very sour note. This will set the stage for a very weak 2009 economy. Also, that year-end decline was quite dramatic, yet its impacts will not be fully appreciated by looking at the overall numbers for 2008, as they are buoyed upward by the comparatively modest results of the year's first three quarters.

For the year, the Utah economy was able to chalk up job growth of a minimal 0.1 percent--the addition of 1,150 jobs. But when one considers that the employment growth for 2007 was 4.0 percent, that's a pretty significant employment decline between one year (2007) and the next (2008).

Employment by Industry

Mining This year recorded the historically highest oil prices, to date. This translated into high energy prices across the board, and sig-

nificantly spurred the ongoing production and search for additional supplies of oil and natural gas in Utah. An energy boom marked this industry's profile of 2008, and the industry added close to 1,500 new jobs. Most of mining's growth is in the Uintah Basin, with oil jobs in Duchesne County and natural gas driving Uintah County. However, as rapidly as energy prices rose, they collapsed at the very end of the year, and though the year was characterized with a boom, by December the stage was cleared and set for an energy bust to ripple through 2009.

Utah's Economy - 2008

It was a powerful economic tsunami that rolled over the state of Utah in 2008. The consequences of the national subprime mortgage meltdown that began in late 2007 overwhelmed Utah. There were times in the past when national economic woes did not translate into a Utah slowdown. But this national downturn was too powerful. It came in two waves. The second wave emerged in late 2008, after the deep-seated unraveling of the subprime mortgage labyrinth finally made it clear who within the financial market was impacted and by how much. The result was that the mortgage woes now permeated throughout the greater economy, causing a deep-seated employment contraction throughout the nation's and Utah's economies. The year ended on a very sour note. This will set the stage for a very weak 2009 economy. Also, that year-end decline was quite dramatic, yet its impacts will not be fully appreciated by looking at the overall numbers for 2008, as they are buoyed upward by the comparatively modest results of the year's first three quarters.

For the year, the Utah economy was able to chalk up job growth of a minimal 0.1 percent--the addition of 1,150 jobs. But when one considers that the employment growth for 2007 was 4.0 percent, that's a pretty significant employment decline between one year (2007) and the next (2008).

Employment by Industry

Mining This year recorded the historically highest oil prices, to date. This translated into high energy prices across the board, and sig-

nificantly spurred the ongoing production and search for additional supplies of oil and natural gas in Utah. An energy boom marked this industry's profile of 2008, and the industry added close to 1,500 new jobs. Most of mining's growth is in the Uintah Basin, with oil jobs in Duchesne County and natural gas driving Uintah County. However, as rapidly as energy prices rose, they collapsed at the very end of the year, and though the year was characterized with a boom, by December the stage was cleared and set for an energy bust to ripple through 2009.

Construction The subprime mortgage problem took its toll on this industry in 2008. Job losses totaled just under 13,000, a significant amount of employment loss for Utah in any one industry. Nearly all of this is in residential construction, as nonresidential construction was still going strong in 2008. In fact, 2008 saw one of the highest amounts of valuation approved for nonresidential projects. This is still a remnant of the 2006 residential building boom. Historically we see that when residential valuation reaches a peak value (as it did in 2006), roughly two years later nonresidential valuation will have a peak of its own. That peak was reached in 2008. Fortunately, the nonresidential sector did well, therefore it helped to temper some of the job losses seen on the residential side.

Manufacturing The national recession is starting to impact this industry in 2008, particularly in the last several months of the year. When recessions hit, it doesn't matter within which industry the spark was started, the flames always and quickly find their way into the manufacturing sector. This industry principally produces big ticket items to which businesses and consumers make significant adjustments in order to acquire a product. These items are some of the first to be sacrificed when a recession emerges. For the year, the industry is only down 1,800 positions, but even more widespread losses have emerged after October, unfortunately setting the stage for what will probably be a rough year for this industry in 2009. For 2008, this industry employed 125,800 Utahns.

Trade, Transportation, Utilities This is the largest employment sector in Utah, accounting for nearly 20 percent of all jobs. But it is also one succumbing to the national recession. Granted the industry recorded a calendar year growth rate of 0.9 percent, but as of the last three months of the year, this industry was losing jobs precipitously. This is the primary industry to capture consumer spending dollars. After the September 2008 stock market crash, consumers became very skittish about spending. Therefore, the Christmas season was very weak, negatively affecting

the prime spending period for the retail trade sector, a key sub-component within this sector.

Information This was a weak industry in 2007, and it became an even weaker industry in 2008. The loss of 1,700 additional jobs in 2008 accelerated job losses in this industry. It is one of the smaller industries in Utah, accounting for only 2.5 percent of all employment. Only the mining industry makes up a smaller percentage at 1 percent.

Financial Activity It was the meltdown of the subprime mortgage lending that tipped the U.S. and Utah economies into recession. Therefore, one would think this would be the hardest-hit industry in this downturn. That is not the case. Yes, it has lost close to 700 jobs in 2008, but considering the scope of the nation's financial problems and all of the bank and securities bailouts that were issued by the federal government, this industry is actually holding up surprisingly well in Utah, considering. One of the reasons is that the Utah financial sector did not have a large Wall Street presence within its industry base. The only one it did have of any size is Morgan Stanley, and it was only one of two Wall Street securities firms to emerge relatively unscathed. The financial sector comprises around 6 percent of the Utah employment base.

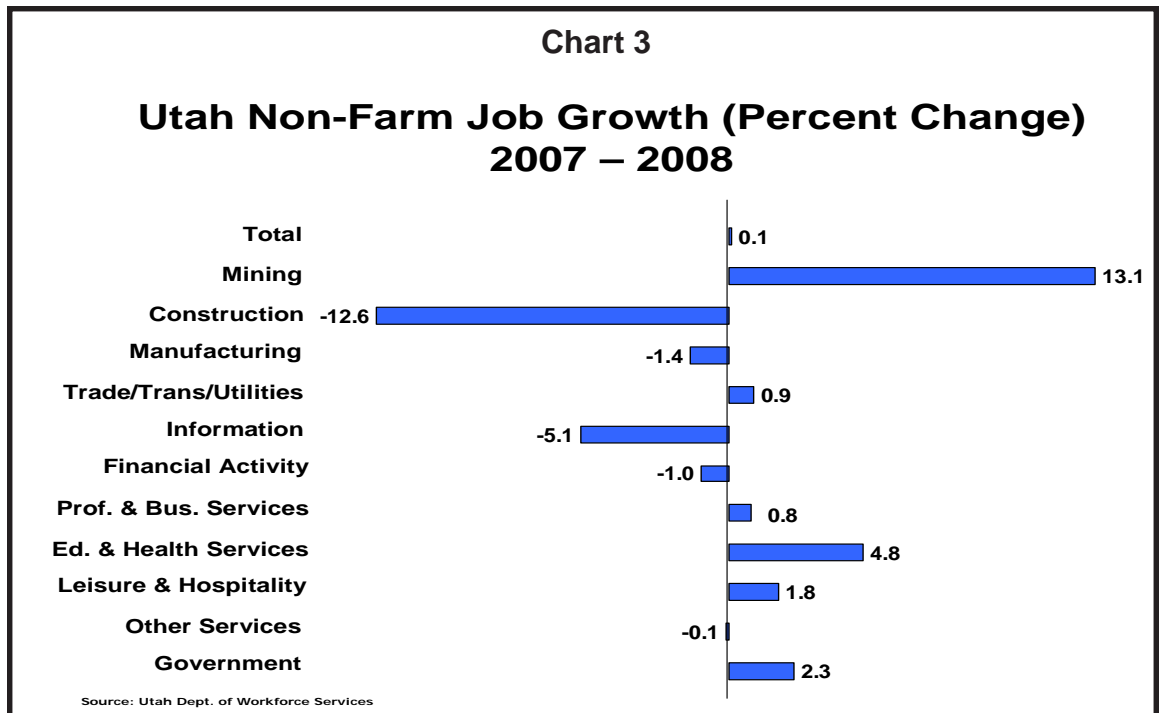

Professional and Business Services Those businesses whose major input is human capital are grouped together within this sector. It consists of high-paying professional services, and lesser-paying business services. This industry showed growth this year of 1,170 positions, but like most other industries, the growth weakened noticeably by year's end. The high-paying professional services did well this year, adding 3,260 new jobs to the economy. But the lesser-paying business services recorded job losses of 2,200. This comes as no surprise, as one of the major aspects within business services is the employment placement agencies, which includes temporary help services. This indus-

try is built to be as flexible as the economy demands. When the economy is expanding, this becomes an expansion industry as employers can bring workers on quickly, and also use this employment vehicle as a way of "trying out" workers. Conversely, as in the environment of 2008, it is also an industry where workers can be shed. A declining business environment, such as in 2008, will result in employment declines in this industry. The numbers certainly reflect that.

Education and Health Services This sector is Utah's most consistent. It has been a continuous grower, and this year is no exception. Even in the face of the early 2000s recession when many other industrial sectors

were shedding jobs or pausing to gauge the surrounding environment, this industry expanded at full force. This sector continued that strong pace again this year, added over 6,600 new jobs to Utah's employment base. This continues the distinction that this industry has had year-to-year growth of 4 percent or higher throughout this decade.

Leisure and Hospitality This sector was constructed to be a proxy for tourism, and so nearly 2,000 new jobs and a 1.8 percent growth rate would suggest that tourism had a respectable year in Utah. Growth in this sector was observed across the state, which is a plus, as many of Utah's rural counties rely heavily upon tourism for their economic vital-

ity. But the last quarter of 2008 showed the recessionary economy catching up with this industry. As a result of the declining economy after September 2008, the tourism industry (particularly the onset of the 2008-2009 ski season) experienced a setback in tourism trips, and thus tourism spending.

Other Services This is kind of a catch-all sector on the service-producing side of the ledger. It has a potpourri of businesses within its classification, such as repair services, personal services, and membership organizations. It's not a particularly large sector, employing around 35,600 workers. It experienced a slight job loss of 40 positions for the year.

Government Government is a large employer in Utah. It consists of three components—federal, state, and local. Together, they make up just under 17 percent of Utah's employment base, the second highest among all industries.

This sector added 4,800 new jobs over the past year, a growth rate of 2.8 percent. The biggest driver of this growth is local government, in particular K-12 education. Utah is experiencing a large influx of K-6 year-old children throughout this decade, so it is only natural to see the education payrolls increase.

Wage Growth Stays Positive This Year

In 2007, Utah's unemployment rate averaged 2.7 percent, its lowest unemployment rate ever. A labor market that tight naturally translates into strong wage gains, as employers must be wage-price aggressive in this environment to not only attract new labor, but to retain existing workers.

The tightness of that 2007 labor market began to unwind in 2008, but there was so much "tightness" to unwind that it will probably take more than a year to see a wage environment that will look like a 180 degree turn from 2007,

as one would expect with the onset of a strong national recession.

The unemployment rate for 2008 only measured 3.4 percent. The labor market entered the year tight, but loosened as the months progressed. As a result, 2008's year-over average monthly wage gain measured 2.6 percent. This is a positive in a down economy, yet only half the record 5.5 percent wage gain recorded in 2007 and a signal that the labor/wage market unwound progressively as 2008 advanced.

At times there can be an irony within the average wage calculation. Take, for example, the construction industry's 4.5% average wage gain in 2008, even with the loss of nearly

13,000 jobs for the year. The job losses might lead one to believe that the average wage would fall. But not if the ones who are losing their jobs are the lower-paid workers within that industry. That is probably the case with construction, as the more skilled, and thus higher-paid workers, are the ones who are managing to hang on to their jobs. Where one will ultimately see the wage impact from the lost 13,000 construction jobs is in total wages earned throughout this industry. Whereas this industry produced \$3.9 billion in payroll wages in 2007, that number had slipped to \$3.6 billion in 2008.

Total wages paid by all industries into the Utah economy totaled \$46.9 billion. That is up from 2007's \$45.7 billion. Most industries saw total wage gains over their 2007 payrolls, but with a recession taking hold in 2008, there were some who did not. These include the aforementioned construction, trade/transportation/utilities, information, and financial activities.

Mark Knold
Chief Economist

Construction The subprime mortgage problem took its toll on this industry in 2008. Job losses totaled just under 13,000, a significant amount of employment loss for Utah in any one industry. Nearly all of this is in residential construction, as nonresidential construction was still going strong in 2008. That is probably the case with construction, as the more skilled, and thus higher-paid workers, are the ones who are managing to hang on to their jobs. Where one will ultimately see the wage impact from the lost 13,000 construction jobs is in total wages earned throughout this industry. Whereas this industry produced \$3.9 billion in payroll wages in 2007, that number had slipped to \$3.6 billion in 2008.

Total wages paid by all industries into the Utah economy totaled \$46.9 billion. That is up from 2007's \$45.7 billion. Most industries saw total wage gains over their 2007 payrolls, but with a recession taking hold in 2008, there were some who did not. These include the aforementioned construction, trade/transportation/utilities, information, and financial activities.

Mark Knold
Chief Economist

UTAH'S LARGEST EMPLOYERS

<u>FIRM NAME</u>	<u>BUSINESS</u>	<u>EMPLOYMENT RANGE ANNUAL AVERAGE 2008</u>
Intermountain Health Care	Hospitals	20000+

1/ Beginning with 2001, Cache County is a new breakout, therefore data prior to 2001 are not available in this table.

2/ Data were available in Table 25 for previous years.

3/ Due to disclosure issues, cities will not add up to county total.

4/ The city of Cove was added in 2008.

1/ Salt Lake City includes Downtown, East Side, Avenues, University, East Bench, Sugar House, South State and various other areas, and therefore, will not add to County total.

2/ New Community breakout.

3/ Due to disclosure issues, cities will not add up to county total.

4/ Data fluctuations due to data programming changes.

5/ Data no longer available due to change in geographical collection of data

6/ Now split into two separate cities

1/ Employment changes reflect improved data collection at the traffic zone level.

2/ New Community breakout.

3/ Due to disclosure issues, cities will not add up to county total.

4/ Changes in employment growth/decline due to traffic zone reassignment.

5/ Changes in employment growth/decline due to new geographical collection of data.

Employment: Beginning of Quarter Employment Total number of workers who were employed by the same employer in both the current and previous quarter. Note: Employment does not include Federal Government or Non-covered employers.

Net Job Flows: The difference between current and previous employment at each business.

Job Creation: The number of new jobs that are created by either new area businesses or the expansion of employment by existing firms.

New Hires: Total number of accessions that were also not employed by that employer during the previous four quarters.

Separations: Total number of workers who were employed by a business in the current quarter, but not in the subsequent quarter.

Turnover: Turnover Rate = (1/2) * (full-quarter accessions + full-quarter separations) / employment stable jobs.

DEFINITIONS

Nonagricultural Employment: A calendar year average of the number of nonagricultural employees reported to the Utah Department of Workforce Services by Employers subject to Utah's unemployment insurance laws, federal agencies in Utah subject to the Unemployment Compensation for Federal Employees (UCFE) program and other Utah nonagricultural employers not included under unemployment insurance.

As a result of multiple job holding and payroll turnover, more than one employer reports some workers. Therefore, the count is not of persons, but of jobs.

Nonagricultural employment includes most corporation officials, executives, supervisory personnel and clerical workers. It excludes proprietors, self-employed, unpaid family workers who neither work nor received wages as a result of strikes or work stoppages, temporary layoffs or unpaid sick or vacation leave.

Establishments: Any firm, organization or division for which data is separately reported to the Utah Department of Workforce Services, i.e. individual physical facilities such as stores, plants, offices, and other worksites.

Total Wages: All yearly remuneration paid to nonagricultural workers, including gross wages, commissions, bonuses, cash value of meals, lodging, and other gratuities when furnished as payment for the job. Reimbursement for travel or other business expenditures are not included.

Average Monthly Wage: "Total Wages" divided by the number of employees on nonagricultural payrolls.

Utah's Economy - 2008

It was a powerful economic tsunami that rolled over the state of Utah in 2008. The consequences of the national subprime mortgage meltdown that began in late 2007 overwhelmed Utah. There were times in the past when national economic woes did not translate into a Utah slowdown. But this national downturn was too powerful. It came in two waves. The first wave actually began in late 2007, when new home building permitting was basically reduced by half, and this resulted in the residential construction workforce being cut back in an aggressive fashion.

The second wave emerged in late 2008, after the deep-seated unraveling of the subprime mortgage labyrinth finally made it clear who within the financial market was impacted and by how much. The result was that the mortgage woes now permeated throughout the greater economy, causing a deep-seated employment contraction throughout the nation's and Utah's economies. The year ended on a very sour note. This will set the stage for a very weak 2009 economy. Also, that year-end decline was quite dramatic, yet its impacts will not be fully appreciated by looking at the overall numbers for 2008, as they are buoyed upward by the comparatively modest results of the year's first three quarters.

For the year, the Utah economy was able to chalk up job growth of a minimal 0.1 percent--the addition of 1,150 jobs. But when one considers that the employment growth for 2007 was 4.0 percent, that's a pretty significant employment decline between one year (2007) and the next (2008).

Employment by Industry

Mining This year recorded the historically highest oil prices, to date. This translated into high energy prices across the board, and sig-

nificantly spurred the ongoing production and search for additional supplies of oil and natural gas in Utah. An energy boom marked this industry's profile of 2008, and the industry added close to 1,500 new jobs. Most of mining's growth is in the Uintah Basin, with oil jobs in Duchesne County and natural gas driving Uintah County. However, as rapidly as energy prices rose, they collapsed at the very end of the year, and though the year was characterized with a boom, by December the stage was cleared and set for an energy bust to ripple through 2009.

Construction The subprime mortgage problem took its toll on this industry in 2008. Job losses totaled just under 13,000, a significant amount of employment loss for Utah in any one industry. Nearly all of this is in residential construction, as nonresidential construction was still going strong in 2008. In fact, 2008 saw one of the highest amounts of valuation approved for nonresidential projects. This is still a remnant of the 2006 residential building boom. Historically we see that when residential valuation reaches a peak value (as it did in 2006), roughly two years later nonresidential valuation will have a peak of its own. That peak was reached in 2008. Fortunately, the nonresidential sector did well, therefore it helped to temper some of the job losses seen on the residential side.

Manufacturing The national recession is starting to impact this industry in 2008, particularly in the last several months of the year. When recessions hit, it doesn't matter within which industry the spark was started, the flames always and quickly find their way into the manufacturing sector. This industry principally produces big ticket items to which businesses and consumers make significant adjustments in order to acquire a product. These items are some of the first to be sacrificed when a recession emerges. For the year, the industry is only down 1,800 positions, but even more widespread losses have emerged after October, unfortunately setting the stage for what will probably be a rough year for this industry in 2009. For 2008, this industry employed 125,800 Utahns.

Trade, Transportation, Utilities This is the largest employment sector in Utah, accounting for nearly 20 percent of all jobs. But it is also one succumbing to the national recession. Granted the industry recorded a calendar year growth rate of 0.9 percent, but as of the last three months of the year, this industry was losing jobs precipitously. This is the primary industry to capture consumer spending dollars. After the September 2008 stock market crash, consumers became very skittish about spending. Therefore, the Christmas season was very weak, negatively affecting

the prime spending period for the retail trade sector, a key sub-component within this sector.

Information This was a weak industry in 2007, and it became an even weaker industry in 2008. The loss of 1,700 additional jobs in 2008 accelerated job losses in this industry. It is one of the smaller industries in Utah, accounting for only 2.5 percent of all employment. Only the mining industry makes up a smaller percentage at 1 percent.

Financial Activity It was the meltdown of the subprime mortgage lending that tipped the U.S. and Utah economies into recession. Therefore, one would think this would be the hardest-hit industry in this downturn. That is not the case. Yes, it has lost close to 700 jobs in 2008, but considering the scope of the nation's financial problems and all of the bank and securities bailouts that were issued by the federal government, this industry is actually holding up surprisingly well in Utah, considering. One of the reasons is that the Utah financial sector did not have a large Wall Street presence within its industry base. The only one it did have of any size is Morgan Stanley, and it was only one of two Wall Street securities firms to emerge relatively unscathed. The financial sector comprises around 6 percent of the Utah employment base.

Professional and Business Services Those businesses whose major input is human capital are grouped together within this sector. It consists of high-paying professional services, and lesser-paying business services. This industry showed growth this year of 1,170 positions, but like most other industries, the growth weakened noticeably by year's end. The high-paying professional services did well this year, adding 3,260 new jobs to the economy. But the lesser-paying business services recorded job losses of 2,200. This comes as no surprise, as one of the major aspects within business services is the employment placement agencies, which includes temporary help services. This indus-

try is built to be as flexible as the economy demands. When the economy is expanding, this becomes an expansion industry as employers can bring workers on quickly, and also use this employment vehicle as a way of "trying out" workers. Conversely, as in the environment of 2008, it is also an industry where workers can be shed. A declining business environment, such as in 2008, will result in employment declines in this industry. The numbers certainly reflect that.

Education and Health Services This sector is Utah's most consistent. It has been a continuous grower, and this year is no exception. Even in the face of the early 2000s recession when many other industrial sectors

were shedding jobs or pausing to gauge the surrounding environment, this industry expanded at full force. This sector continued that strong pace again this year, added over 6,600 new jobs to Utah's employment base. This continues the distinction that this industry has had year-to-year growth of 4 percent or higher throughout this decade.

Leisure and Hospitality This sector was constructed to be a proxy for tourism, and so nearly 2,000 new jobs and a 1.8 percent growth rate would suggest that tourism had a respectable year in Utah. Growth in this sector was observed across the state, which is a plus, as many of Utah's rural counties rely heavily upon tourism for their economic vital-

ity. But the last quarter of 2008 showed the recessionary economy catching up with this industry. As a result of the declining economy after September 2008, the tourism industry (particularly the onset of the 2008-2009 ski season) experienced a setback in tourism trips, and thus tourism spending.

Other Services This is kind of a catch-all sector on the service-producing side of the ledger. It has a potpourri of businesses within its classification, such as repair services, personal services, and membership organizations. It's not a particularly large sector, employing around 35,600 workers. It experienced a slight job loss of 40 positions for the year.

Government Government is a large employer in Utah. It consists of three components—federal, state, and local. Together, they make up just under 17 percent of Utah's employment base, the second highest among all industries.

This sector added 4,800 new jobs over the past year, a growth rate of 2.8 percent. The biggest driver of this growth is local government, in particular K-12 education. Utah is experiencing a large influx of K-6 year-old children throughout this decade, so it is only natural to see the education payrolls increase.

Wage Growth Stays Positive This Year

In 2007, Utah's unemployment rate averaged 2.7 percent, its lowest unemployment rate ever. A labor market that tight naturally translates into strong wage gains, as employers must be wage-price aggressive in this environment to not only attract new labor, but to retain existing workers.

The tightness of that 2007 labor market began to unwind in 2008, but there was so much "tightness" to unwind that it will probably take more than a year to see a wage environment that will look like a 180 degree turn from 2007,

as one would expect with the onset of a strong national recession.

The unemployment rate for 2008 only measured 3.4 percent. The labor market entered the year tight, but loosened as the months progressed. As a result, 2008's year-over average monthly wage gain measured 2.6 percent. This is a positive in a down economy, yet only half the record 5.5 percent wage gain recorded in 2007 and a signal that the labor/wage market unwound progressively as 2008 advanced.

At times there can be an irony within the average wage calculation. Take, for example, the construction industry's 4.5% average wage gain in 2008, even with the loss of nearly

13,000 jobs for the year. The job losses might lead one to believe that the average wage would fall. But not if the ones who are losing their jobs are the lower-paid workers within that industry. That is probably the case with construction, as the more skilled, and thus higher-paid workers, are the ones who are managing to hang on to their jobs. Where one will ultimately see the wage impact from the lost 13,000 construction jobs is in total wages earned throughout this industry. Whereas this industry produced \$3.9 billion in payroll wages in 2007, that number had slipped to \$3.6 billion in 2008.

Total wages paid by all industries into the Utah economy totaled \$46.9 billion. That is up from 2007's \$45.7 billion. Most industries saw total wage gains over their 2007 payrolls, but with a recession taking hold in 2008, there were some who did not. These include the aforementioned construction, trade/transportation/utilities, information, and financial activities.

Mark Knold
Chief Economist
